

CASE STUDY - LOUISE

LOUISE AND HER 2 CHILDREN TOOK PART IN THE ENTIRE CHALLENGE. HERE IS SOME OF HER FEEDBACK!

"BOX 1 really sparked off the whole project and I think was the one which began the conversation with my kids about saving water so this had the biggest impact on water usage. The book in BOX 1 also really sparked my daughter's interest in where water goes once down the plug hole! BOX 2 was the perfect follow on for this exploring the water cycle even further! They loved collecting the rain water in BOX 3 so much too! Conversations are now had on walks when we pass drains or see clouds in the sky about where water is going and what is happening to the water."

"The children taking part were nearly 4 years old and they loved the surprise of receiving the boxes and couldn't wait for the next ones! There was such a fantastic mix of activities in each one too, kept simple but with lots of layers of information enabling you to tailor it to your child's level of understanding. The stickers to complete it with the pin badge at the end was just the best touch ever! My kids were so excited to collect their pin badges at the end! I don't know what I'd improve but just keep up the wonderful work! The boxes blended and built on each other beautifully so I'd just love to see this level of detail in the next project ... which we can't wait for!"

FEEDBACK

"I actually knew nothing about my water usage until we did some of these boxes. My kids have learned lots and we are making changes around the house already."

"We were shocked that this was a free activity because it was so in depth and all the materials were amazing! We love our scented playdough!"

"Who knew the water cycle could be this fun? Will will definitely do the next box!"

"My son put his paper house on the windowsill and we still look at it for inspiration on how to save water! Genius!"

"We enjoyed every element of this challenge and particularly loved that it meant we visited the library every month!"
